TSANEWS

TSANews app is a mobile application designed exclusively for employees to download on their personal smartphones to receive non-SSI information about TSA. The app is intended to continue to improve communication across TSA and make it more convenient for employees to access TSA content. While anyone with a smartphone can download this app, only TSA employees with an active TSA email address are able to access the content.

TSA does not have the capability to identify either individual users or any user actions taken outside of the TSANews app.

In the app you are also able to search USAJobs for any TSA jobs.

Downloading the **TSANews** app is optional for employees. TSA will not reimburse employees for any costs that may be incurred while using the app.

If you have any issues or would like to provide feedback, you can use the **Feedback** link available in the app's settings menu, or email **TSANewsApp@tsa.dhs.gov**. If reporting a technical issue, please include your smartphone's make and model.
